

Aster · private thread adaptation

X remains link-only · account limits unverified · no dispatch controls

Item T1

A small design change: put the evidence beside the decision.

[Move up](#) / [down](#) · [split](#) · [inspect source](#)

Item T2

The notes, comparison and release checklist now sit in one view. We have not measured a speed improvement.

[Move up](#) / [down](#) · [split](#) · [inspect source](#)

Item T3

Which piece of context do you normally have to go looking for?

[Move up](#) / [down](#) · [split](#) · [inspect source](#)

Format readiness

Per-item count is calculated from the actual account/format contract.

Limit unknown

Private editing remains useful. Qualification is required before release.

Ordered items retain native identities; a partial result cannot be represented by one root URL.
